

Volvo Penta - AQD21A**£ 2,295****Description**

Volvo Penta AQD21A 75hp Sterndrive Marine Diesel Engine PAIR AVAILABLE Volvo Penta AQD21A 75hp Four Cylinder Heat Exchanger Cooled Marine Diesel Engine With Volvo Penta 270 Sterndrive Adaptation. We have a pair of these engines available. They were stored by a client for several years pending completion of a project which has ultimately been abandoned. The engines were tested and partially overhauled before being placed in storage some years ago. Our workshops have test run both units and apart from one needing some replacement fuel system parts, they both start and run as they should. Manifolds and heat exchangers are in good order with no cracks or pinholes evident. These can also be used as replacement core engines for existing MD21A and MD21B inboard engines by changing the bell housing and front mounting brackets. Rarely seen on the used market and offering a cost effective replacement for existing tired or faulty units or to replace 4 cylinder Volvo Penta petrol engines on a river cruiser etc. Price is per engine. Shipping can be arranged anywhere in the UK or Worldwide at buyers cost. Please call 07809 524834 for further details.
