

**Volvo - Volvo Penta TAMD22 105hp Marine Diesel Engine**

£ 5,995

**Description**

Volvo Penta TAMD22 105hp Four Cylinder Turbo Aftercooled Marine Diesel Engine Complete With Instrumentation & Wiring Harness, SX Sterndrive, Transom Assembly, Trim Pump, Power Steering System etc. This is a brand new old stock engine package dating from 1999. It has never been installed in a boat and has been in storage gathering dust since delivered. The engine is currently set up for a rare Volvo SX sterndrive configuration and can be made available as engine only or a complete package with new old stock SX Sterndrive, Transom Assembly, Trim Pump, Power Steering System etc. There is also the sterndrive exhaust elbow but if the engine is required for shaft drive, it can be fitted with a new standard exhaust elbow. If used to replace an existing shaft drive MD22, TMD22 or TAMD22 engine, you would simply transfer over your flywheel housing, drive plate and gearbox. Alternatively we have all of these available in stock and can convert for you. Engine Only - £5995 VAT Engine With SX Drive Package £9750 VAT The chances of ever seeing another brand new, unused TAMD22 are essentially nil. A very rare beast indeed. Shipping can be arranged anywhere in the UK or Worldwide at buyers cost. Please call our office on 01935 83876 for further details.
